Ground Penetrating Radar Work & TELUS Purefibre Build

Community Notification

Ground Penetrating Radar (GPR) update

In July a GPR study **in the area outlined in blue** by Ember Archaeology and with guidance from CRDAC. Following the assessment CRDAC will work closely with community members to mark any potential anomalies identified. While It is important to note that the anomalies are not confirmed remains, a cross will be placed to mark each location to ensure we recognize and respect these areas.

TELUS Construction: *Outside* the GPR area

Over the coming weeks, TELUS crews will begin the Purefibre build **in the area outlined in red**, outside of the GPR area. Our crews will be placing new conduit which involves ground disturbance. Additional equipment you may see during construction includes bucket trucks, hydrovacs, excavators, backhoes, and/or directional drills.

TELUS Construction: *Within* the GPR area

TELUS will continue to work closely with CRDAC and will follow CRDAC's guidance on the appropriate procedures for doing any work within this area. This will include sharing a notification and having a community monitor on site during t he work.

COVID-19 Field Protocols

The safety of community members is TELUS' top priority, and we will be adhering to the following COVID-19 protocols:

- Any team member showing symptoms of illness is required to remain home
- Respecting a physical distance of 2m/ 6' per the Canada Public Health Agency
- Wearing Personal Protection Equipment and utilizing disinfectant where necessary
