
TELUS PureFibre™ Network for Conklin Metis Community

Starting October 5th, 2022 you will notice TELUS crews and our authorized contractors in community working to upgrade the network to TELUS PureFibre. Part of this work includes bringing underground Fibre right up to the premise, which is known as a “Fibre drop”. There is no cost to residents, The only costs would be if individuals or businesses choose to purchase individual services over the network, of which there is no obligation to do so.

What will happen during construction?

- Surveying, Locating, Buried and Arial Drops

COVID-19 Field Protocols

The safety of the Conklin community is TELUS’ top priority, and we will be adhering to the following COVID-19 protocols:

- Any team member showing symptoms of illness is required to remain home
- Respecting a physical distance of 2m/ 6’ per the Canada Public Health Agency
- Wearing Personal Protection Equipment and utilizing disinfectant where necessary

What is PureFibre?

The TELUS PureFibre network is a revolutionary new internet technology powered by flexible strands of transparent glass no thicker than human hair. These fibre optic strands transmit information as pulses of light, and carry huge amounts of information in the space of seconds. Fibre delivers unparalleled upload and download speeds. Upgrading the network to fibre is an investment that will ensure the network can withstand the demands of new technologies which will be realized over future generations.

- TELUS PureFibre provides access to internet services of up to 1.5 Gbps down and 940 Mbps up, TELUS Optik TV®, TELUS SmartHome Security services and TELUS Secure Business
